

Critical Infrastructure Projects

As the leading statewide organization for Alaska’s tourism industry, the Alaska Travel Industry Association (ATIA) seeks to identify statewide or region-wide critical infrastructure and planning projects that support a strong and vibrant tourism industry. ATIA uses a weighted ranking process to identify critical projects and focus our advocacy efforts.

Any ATIA member may submit a project for consideration by ATIA’s Tourism Policy and Planning (TPP) Committee. For greatest effect, critical infrastructure and planning projects should be identified early in the review process, where ATIA involvement can make a difference in project decisions and outcomes.

Projects recommended for ATIA involvement by the TPP will be submitted to the ATIA Board of Directors for final approval.

To submit a project for consideration, please provide the following information and e-mail to jjessen@alaskatia.org.

	Name of Project:
	Lead Agency:
	Project Cost: \$
	Project Purpose:
	Project Status: (planning, environmental review, design/construction)
	ATIA action needed by (date): <i>e.g., posted public comment period deadline</i>
	Website for more information:

Name of individual, business, or organization submitting this project for consideration:

Statement of Support:

Please describe if there is any known opposition to the project?
